With more than ten years of experience in visual design, UX, and front-end development, I specialize in creating practical designs that effectively solve complex problems. My expertise lies in visual UI design and design systems, with a strong focus on delivering exceptional user experiences. I am passionate about using my skills and experience to make a meaningful impact in any design role.

Experience

Sr Product Designer @ SecureDocs, Inc.

2018 - Present, Goleta, California

- Responsible for shaping the visual design across SecureDoc's evolving product line.
- Working closely with product managers and engineers to support projects throughout their entire lifecycle.
- Produce and deliver digital assets to all functions of the company, including leadership, marketing, and engineering.
- Leading and mentoring new members of the design team.

Sr UI Designer @ RightScale

2012 - 2018, Santa Barbara, California

- Responsibilities include product design, prototyping and front-end web app development.
- Worked closely with UX designers, product managers and front-end engineers to accomplish design goals.
- Attended customers interviews for UX research and iterated designs based on those interviews.

Web Designer @ University of California, Merced

2010 - 2012, Merced, California

- Responsible for UI design, brand development, and website theme development for the University's public web products.
- Worked with other University departments as a web design consultant and assisted in launching their web projects.

Web Designer @ The Fresno Bee

2007 - 2010, Fresno, California

- Responsible for designing editorial web products, such as the homepage, section pages, and other online news products.
- Collaborated closely with editorial staff to develop engaging web content and news stories.
